September 2004

## **About ILSI**

The International Life Sciences Institute (ILSI) is a nonprofit, worldwide foundation established in 1978 to advance the understanding of scientific issues relating to nutrition, food safety, toxicology, risk assessment, and the environment. ILSI also works to provide the science base for global harmonization in these areas.

By bringing together scientists from academia, government, industry, and the public sector, ILSI seeks a balanced approach to solving problems of common concern for the well-being of the general public.

ILSI is headquartered in Washington, D.C. ILSI branches include Argentina, Brasil, Europe, India, Japan, Korea, Mexico, North Africa and Gulf Region, North America, North Andean, South Africa, South Andean, Southeast Asia Region, the Focal Point in China, and the ILSI Health and Environmental Sciences Institute. ILSI also accomplishes its work through the ILSI Research Foundation (composed of the ILSI Human Nutrition Institute and the ILSI Risk Science Institute) and the ILSI Center for Health Promotion. ILSI receives financial support from industry, government, and foundations.

## TABLE OF CONTENTS

ILSI PUBLICATIONS RELATED TO FOOD BIOTECHNOLOGY.....	3
INTERNATIONAL DOCUMENTS AND REPORTS ON PLANT BIOTECHNOLOGY .....	4
NATIONAL FOOD SAFETY REGULATIONS/GUIDELINES.....	10
SCIENTIFIC ARTICLES.....	14
General.....	14
Detection Methods.....	24
Environmental.....	28
Allergenicity Assessment of Foods Derived from Genetically Modified Plants.....	42
Safety of Antibiotic Resistance Markers in Genetically Modified Plants .....	47
General Safety and Safety of Specific Genetically Modified Crops.....	51
General.....	51
Canola .....	55
Corn.....	56
Cotton .....	61
Potatoes .....	62
Rice.....	63
Soybeans.....	64
Tomatoes.....	66
Protein Safety.....	67
Advantages of Plant Biotechnology Products.....	71
General.....	71
Corn.....	77
Cotton .....	78
Emerging Economies .....	82
Environmental.....	87
Nutrition .....	89
Pharmaceutical.....	95
Animal Feed Performance .....	99
Protein and DNA Detection in Meat and Milk from Animals Fed Genetically Modified Crops .....	113
